

Course Information, Advice & Guidance

You will have had progression and careers advice at school and thought carefully about how the subjects you want to take at SSFC suit your plans for the future. Our aim is to make sure that you are on the programme of study that you are best suited for, that helps you to prepare for your future and that supports your success.

At open events, interview, pre-enrolment and enrolment, Curriculum Advisers are available to answer any questions you may have about your programme of study.

Our experience of teaching level 3 courses, as well as data evidence, tells us that your performance across the whole range of GCSE courses is the best indicator of a successful outcome for you. The diagram below gives an indication of the overall GCSE profile needed but, in addition, each subject has specific entry requirements which can be viewed at www.ssfc.ac.uk.

Please note that achieving grade C in English and Maths is crucial for many subjects.
